

Location: South Western Ontario

Position: HVAC Sales Engineer

CSSI, Comfort System Solutions Inc, is a HVAC rep firm located in Mississauga, and serving all of Southern Ontario.

Due to the recent success of our CGC Group Hybrid Heat Pump System, we are looking for a HVAC Sales Engineer to assist in the application of this leading edge technology. www.cssi.ca

We are expanding our line card to be the premier *Renewable Energy* oriented HVAC sales organization in Southern Ontario. We have recently added a line of Solar Heating to our offering and will be adding more energy related system in the future.

Reporting to the Sales Manager, the main responsibilities and objectives will be to promote and explain the merits and benefits of an innovative, unique, and very energy efficient HVAC system to consulting engineers, owners and developers in the GTA and South West Ontario market. Negotiations with contractors are an integral part of the duties.

Other supporting responsibilities may include preparing submittal documentation, project management, system application and field support.

The successful applicant will possess a strong HVAC technical background and a proficiency in dealing with people.

Knowledge of the Bid and Spec HVAC construction market is required.

The ideal candidate will be a graduate Mechanical Engineer. Strong communication skills and computer literacy are a requirement.

CSSI offers an attractive compensation & commissions package plus benefits and an exceptional opportunity for career development.

We appreciate all applicants, however only qualified candidates will be contacted.

Please communicate your interest to our Sales Manager at rjg@cssi.ca
